WESTERN AUSTRALIA

ENVIRONMENTAL SUSTAINABILITY POLICY

Policy Statement

We need to review our actions in order to reduce our impact on the planet. We provide education and role modelling to the children in our care. With a view of positive effects feeding back to families and the wider community. Importantly, we empower children to overcome the often 'powerless' feelings that they can have when reflecting on a future filled with environmental issues.

Procedure

- promoting respect for, and an appreciation of, the natural environment among all at the service
- fostering children's capacity to understand and respect the natural environment,
- supporting the development of positive attitudes and values in line with sustainable practices
- ensuring that educators and other staff engage in sustainable practices during the day to day operation
- the incorporation of sustainable practice and messages as a day to day way of operating

Sourced

- Education and Care Services National Law Act 2010
- Education and Care Services National Regulations 2011
- National Quality Standards – Quality Area 3
